Education

Harcourt Butler Technical University Kanpur(India)

Dec 2022 – Jun 2026

B.Tech in Electronics Engineering

- CGPA: 7.88/10

Experience

Full Stack Developer Intern

Remote, Pune

Nexaura Technologies

Aug(2025) - Jan(2026)

- Engineered 3 production microservices in Node.js/Express serving 10,000+ MAU with API versioning, rate limiting, and centralised error handling.
- Optimised MongoDB schemas with compound indexing and aggregation pipelines, reducing query execution time by 45 percent on high-traffic endpoints.
- Set up GitHub Actions CI/CD pipeline with Dockerised deployments to AWS EC2, cutting deploy time from 40 min to 5 min; resolved 25+ production bugs in a 6-engineer team.

Full Stack Developer Intern · MERN Stack

Remote, Bangalore

TechNova Solutions

June - July(2025)

- Collaborated in a 4-engineer Agile team to ship a B2B Analytics Dashboard using MongoDB, Express.js, and React + Chart.js across 2 sprint cycles.
- Parallelised async API calls with Promise.all() cutting response time by 35 percent participated in daily standups and GitHub PR code reviews.
- Proposed dotenv environment config adopted team-wide, standardising dev/staging/prod separation across all 4 engineers.

Projects

Echo-MEET

[Link](#)

- Engineered a full-stack communication platform using React, Express.js, MongoDB, and GetStream APIs — supports secure 1:1 and group messaging, audio/video calls with sub-200ms latency.
- Integrated GetStream Chat and Calls APIs for real-time message sync and presence indicators; secured sessions via JWT authentication validated against MongoDB Atlas.
- Designed modular RESTful API layer in Express.js handling user registration, login, and room management with route/controller separation for scalability.

Movie-Ticket Booking

[Link](#)

- Built full-stack movie booking app with MERN stack — browsable listings, interactive seat selection UI, and real-time availability updates preventing double-booking.
- Integrated Stripe for checkout and Clerk OAuth for social login and secure registration; seat state persisted in MongoDB with instant booking confirmation on payment.
- Architected Node.js/Express backend handling reservation logic, payment webhooks, and booking state with MongoDB schemas for shows, seat maps, and user orders.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, HTML5 / CSS3, SQL

Databases: MongoDB, PostgreSQL, Redis, Mongoose, Aggregation Pipelines

Technologies/Frameworks: : Node.js, Microservices, WebSockets, React.js, Express.js, RESTful APIs, FastAPI, OpenAI APIs,

Developer Tools: Docker, AWS EC2 / S3, GitHub Actions, CI / CD, Git, Linux

Achievements

Solved 300+ problems on leetcode with maximum rating 1500+. [Link](#)

Pupil on codeforces with rating 1200+. [Link](#)
